

What is Verbal Reasoning?

Verbal reasoning can be defined as the ability to understand and comprehend concepts expressed through language, think constructively and apply logic to solve problems. Verbal reasoning is how we understand, reason, and engage with written and verbal language.

Verbal reasoning is a skill, rather than learned knowledge, and helps us to use language to negotiate and explain within our environment.

An example of verbal reasoning is reading or hearing some information or problem, processing the information, forming a theory, and using this to evaluate the outcome of a problem.
