

These specialized jobs are often high paying as compared to others. Secondly, graduates are equipped with problem-solving and critical skills which enables them to contribute positively at great extent towards development of countries infrastructural projects like transportation system, energy networks and communication system.

Countries which are more focused on implementing technical training in the education system often produces highly skilled workforce which contributes to a nation's competitiveness on the global stage. Thus this also attracts foreign investments and drives economic growth.

In summary, the technical education plays vital role in equipping individuals with practical skills, fostering innovation, driving economic growth and addressing demands of various industries. It enables graduate to meaningfully contribute to community and global workforce.

Technical Education

"I emphasise that greater attention should be paid to technical and vocational education"

These golden words by our great leader Quaid-e-Azam are of greatest importance more than ever before. He stressed on technical education, because he knew its contribution to a nation.

Technical education is part of Vocation education which is focused on Practical trainings and hand-on experience. This type of education offers numerous advantages towards individual, Social and economical development of Country.

"Education is the only weapon which can be used to change the world"

Technical training is one of most effective form of learning as it is focused on Skill development through Practical experience. It equips individual with Specialized skills which aligns with the need of various industries. Thus graduates have high employment rates due to high demand of specialized skills.

none received justice. The alarming increase in child sexual abuse demands urgent attention. The reported cases have surged by more than 33% compared to previous year. These horrifying statistics reveal grim reality of children of our society.

"Child abuse cast a shadow the length of a lifetime".

Child Abuse never ends with childhood but sticks with the victim all his life. Major cases of mental trauma reported displays that the victim was subject of some form of child abuse in their childhood and it has badly impacted their adult life and family relations. This shows that childhood abuse badly impact future adult life.

In Conclusion child abuse is grim reality of our society which is growing with a great pace and demands immediate actions at individual and government level.

Child ABUSE

"Silence against child abuse is a violence"

Child abuse is one of the most neglected Crime in our Society. More than 8 children in Pakistan are abused daily on average. Child abuse can be defined as Physical, Emotional, Sexual and Psychological harm to a child.

This deeply concerning issue in Pakistan demands immediate attention, comprehensive reforms and social awareness.

Reports of child abuse and labour in elite households, where vulnerable children work, often go unnoticed by the authorities. A recent tragic case of Rizwana who suffered abuse and torture while working in the home of a judge gathered attention on Social media but unfortunately no justice was done and abusers remained unpunished. Similarly, the case of Fatima, a 10-year-old girl working in house in Khairpur who faced violent behavior and was killed while serving. Apart from these there are thousands of more cases reported and
